Outside Scholarships

Scripps policy aims to let students benefit from their awards as much as possible.

Scripps will use outside scholarships to replace student loan and work awards and the minimum student contributions before reducing Scripps Grants.

For students who receive federal and state aid, the combination of all awards (including scholarships, grants, loan and work awards) cannot exceed their demonstrated financial need as determined under the federal formula.

For students without federal student aid, the combination of Scripps awards and outside awards will not exceed the cost of attendance.
