

# THE NUCLEUS

## SCRIPPS AND PITZER COLLEGES' NEW STATE-OF-THE-ART SCIENCE CENTER

Scripps and Pitzer Colleges have entered a new era of scientific discovery with the opening of **The Nucleus**, a major expansion connecting to the existing science structure. Linking both campuses, The Nucleus features **high-tech labs** and **equipment, classrooms, collaborative spaces, a rooftop greenhouse,** and an **art installation** by Scripps alum and MacArthur Fellow Elizabeth Turk '83.

*Keep reading on the opposite side for more information*

“The Nucleus is far more than a new facility—it’s a catalyst for how science is taught, learned, and advanced at Scripps. By bringing together cutting-edge laboratories, collaborative spaces, and interdisciplinary programs, The Nucleus expands what’s possible for our students and faculty alike.”

—**UJ Sofia**, Weinberg Family  
Dean of the Department  
of Natural Sciences

## THE IMPACT OF YOUR GIFT

Science at Scripps is soaring. STEM majors make up 40 percent of our students, the College is a top producer of future STEM PhDs, and our faculty's research has earned major awards from the National Institutes of Health, the National Science Foundation, and the Mathematical Association of America.

Your gift to The Nucleus supports this growth by:

- Strengthening our interdisciplinary STEM curriculum to prepare versatile, career-ready graduates
- Expanding student-faculty research typically reserved for graduate study
- Attracting top students and distinguished scientists to our community

## MAKE A GIFT TODAY

Join us to transform science education and research! To give to The Nucleus in support of the Department of Natural Sciences, please contact the Office of Philanthropy at [philanthropy@scrippscollege.edu](mailto:philanthropy@scrippscollege.edu). Thank you!
